Green Potted Varieties.

Longfellow. This is the best main crop bean for the market gardener. It produces a heavy crop of extra long, straight, round pods. Price, lb., 18c; 15 lbs., $2.25.

Stringless Green Pod. A bean of extra good quality. The round green pods are entirely stringless and when well advanced in growth retain their crispness and break easily. It is the best bean for conserving and gardeners that have a family trade will find it profitable to grow this variety. Matures in about six weeks. Price lb., 18c; 15 lbs., $2.25.

Fordhook Favorite. Shortly described as being a white seeded Stringless Green Pod. This is one of the most desirable varieties for market gardeners to grow. It grows to maturity in about six weeks and produces a great quantity of long, round, stringless pods. Quality is extra good and remains so even when pods are getting old. Being a white seeded variety it has not the objectionable color of the ordinary

Hodson Wax. This comparatively new variety has jumped into popular favor. The plants are of vigorous growth and very productive, but it takes them rather long to mature. About two weeks later than the Davis Wax. Almost entirely free from rust or blight. Price, lb., 25c; 15 lbs., $3.00.

Weber Wax. A good variety for market. One of the heaviest croppers and a good seller. lb., 25c; 15 lbs., $3.00.
Beets

1 oz. will sow a row of 50 ft. 5 to 6 pounds to the acre.

Crosby's Egyptian. Matures almost as quick as the Extra Early Egyptian, while the quality is far better. The beets are almost round in shape, dark red and make a good top so that bunching is easy. Oz., 10c; ¼ lb., 20c; lb., 60c; 5 lbs., $2.75.

Detroit Dark Red Turnip. One of the most popular beets with the market gardeners. Beet globular and very smooth. Color of skin dark red; flesh deep bright red. The flesh is very tender and sweet, remaining so for a long time. Very uniform in shape, color and quality. An A1 table beet. Oz., 10c; ¼ lb., 25c; lb., 70c; 10 lbs., $6.50.

Early Eclipse. Handsome, smooth, turnip shaped beet of good quality. One of the earliest and a good beet for bunching. Oz., 10c; ¼ lb., 20c; lb., 70c.

Sluis' Peerless Beet

Extra Early. Very Even Intensive Dark Red

In this new strain of Beet seed we offer a most desirable combination of earliness beautiful appearance and perfect shape. It matures fully as early as the Extra Early Egyptian, while quality and shape are not surpassed by any other variety. We do not know of any better sort for bunching—has clean roots; pulls easily and good tops and bunches therefore easily. The flesh is dark red, almost without zones and of unequaled quality. No gardener will make a mistake in planting this sort liberally the next season. Price, oz., 10c; ¼ lb. 25c; lb., 80c; 10 lbs., $7.50.

Swiss Chard (Cut and Come Again) Spinach. This vegetable is worthy of a place in every garden. The leaf and the leaf stem are the eatable parts. When sown early, it may be cut several times throughout the summer. Large Green Leaved, White Ribbed, 1 oz., 10c; 1/4 lb., 20c; 1 lb., $0.75.

Lucullus. Slightly curled, color of the leaves yellowish green. Oz., 10c; 1/4 lb., 25c; 1 lb., $0.80.

Mangel-Wurzel

Mangels or Cow Beets make one of the best winter feeds for dairy cows or young stock. Their culture is very easy and on good soil they will often yield over 1,000 bushels an acre. As a milk producer the Mangel comes near the head of the feed list. Sow 6 pounds to the acre in May or June in rows 2 feet apart and thin the plants when about 3 inches high to 8 to 10 inches in the row.

Mammoth Long Red. Extensively grown. Enormously productive; a good keeper. Good for deep soils. Oz., 7c; lb., $0.50; 5 lbs., $2.25.

Norbiton Giant. Similar to Mammoth Long Red. Oz., 7c; lb., $0.50; 5 lbs., $2.25.

Golden Tankard. A very popular variety of excellent quality. Flesh a deep rich yellow, very sweet and nutritious. Shape a little shorter than the Long Red but thicker. Easily pulled. A very heavy yielder. Oz., 7c; lb., $0.50; 5 lbs., $2.25.

Yellow Eckendorf. This variety comes from Germany, where it is more planted than any other sort. The roots are of about the same shape as the Golden Tankard, but more chunky and get considerable larger, oftentimes weighing as much as from 15 to 25 lbs., apiece. Grow large above the ground and are easily pulled. Flesh, pure white, skin deep yellow. An excellent sort. Oz., 7c; lb., $0.50; 5 lbs., $2.25.

Yellow Globe. Oz., 7c; lb., $0.50; 5 lbs., $2.25.

Klein-Wanzleben. This is one of the best sugar beets and most largely grown. The root is conical, straight and even. While the yield is not quite as heavy as from the largest Mangels, the quality of the beet is so much better, that every dairy farmer should plant liberally of this fine sort. Oz., 10c; lb., $0.60; 5 lbs., $2.75.

French Red Top Sugar. A heavy cropper and of good quality. Ripens early. Oz., 7c; lb., $0.55; 5 lbs., $2.50.

Lance’s Imperial. Oz., 7c; lb., $0.50; 5 lbs., $2.50.

Giant White Half Sugar. One of the best to grow for cattle feed. One of the heaviest croppers and of good quality. Oz., 7c; lb., $0.55; 5 lbs., $2.50.

White Cape. Heads of medium size, close and compact; of a creamy white color. A reliable heading. Pkt., 10c; oz., 30c; 1/4 lb., $1.00.

Italian Sprouting Broccoli. Also imported direct from Italy. Does not make regular heads, but forms a large number of sprouts. Grows about 3 feet tall. Price, oz., 50c; 1/4 lb., $1.75.

Brussels Sprouts

Dwarf Improved. Pkt., 5c; oz., 25c; 1/4 lb., 75c; lb., $2.50.

Cabbage

Pure and Sure-to-head Seed. 1 oz. produces about 2500 plants. Six of the best first early.
CABBAGE—Continued.

Early Jersey Wakefield. Standard early variety of medium size. Heads are very solid and of best quality. Pkt., 5c; oz., 20c; ¼ lb., $0.70; lb., $2.50.

Charleston Wakefield. Grows nearly twice as large as the Early Jersey Wakefield; but is about two weeks later. Heads pointed. Our stock runs very uniform. Pkt., 5c; oz., 20c; ¼ lb., $0.70; lb., $2.50.

Early York. A superior early heading sort. Heads pointed, compact and very solid. May be planted closely. Pkt., 5c; oz., 20c; ¼ lb., $0.70; lb., $2.50.

Early Spring. This variety is nearly as early as the Jersey Wakefield, but the heads are of the round, flat type, like Early Summer. Pkt., 5c; oz., 20c; ¼ lb., $0.70; lb., $2.50.

Copenhagen Market. Gardeners who have grown this cabbage the last couple years are well pleased with it. It is a large, very solid, round heading sort, and comes in as early as the Charleston Wakefield, when sown and planted out at the same time. We can recommend this kind for summer use. Pkt., 10c; oz., $0.30; ¼ lb., $1.00; lb., $3.50.

Sluis' Glory of Enkhuizen. We consider this the best large early cabbage. Comes in at about the same time as Charleston Wakefield, Early Spring or similar early varieties, but the heads are perfectly round, very solid and large, oftentimes weighing as much as 10 to 12 pounds. It grows very dwarf and compact with only a few outer leaves, thus permitting a close planting. It is a better cropper than any other early cabbage and the quality is second to none. Price. pkt., 10c; oz., 30c; ¼ lb., $1.00; lb., $3.50.

Second Early Varieties

Sluis' Allhead Early. Our strain of this variety runs very uniform and is selected every year with the greatest care. The heads are flattish round and very solid. The plants grow compact and may be planted closely. As a main crop variety the Allhead is one of the best. Price, pkt., 5c; oz., 25c; ¼ lb., $0.70; lb., $2.50.

Henderson's Early Summer. A popular variety with market gardeners. About two weeks later than Wakefield, rather larger and globe-shaped. Does not burst readily. Pkt., 5c; oz., 20c; ¼ lb., $0.60; lb., $2.00.

All Seasons. An early sure heading, solid variety. Desirable for early or fall use. Pkt., 5c; oz., 20c; ¼ lb., $0.60; lb., $2.00.

Late or Winter Varieties

Premium Late Flat Dutch. Excellent sort, heads large and solid, short stemmed. A popular sort with gardeners that grow for kraut factories. Very best seed. Pkt., 5c; oz., 20c; ¼ lb., $0.60; lb., $2.50.

Large Flat Swedish. Although this is the first year that we list this Cabbage it is not a new one exactly. We have watched it very carefully and have found it to be an extra good late sort. Heads are large, solid and heavy and results have proved that it gives 50 per cent more tonnage to the acre than Danish Ballhead. We can recommend it to our customers. Pkt., 5c; oz., 30c; ¼ lb., $1.00; lb., $5.50.

East Prairie Winter. This cabbage originated a couple of years ago in one of the principal truck growing sections around Chicago, called East Prairie, near Niles Center. We have grown our stock direct from introducer’s seed from carefully selected heads and recommend it to our customers as a splendid late cabbage and excellent winter keeper. Pkt., 10c; oz., 40c; ¼ lb., $1.50; lb., $5.80.

Danish Ballhead

Danish Ballhead. Tall stemmed. Heads very solid. One of the best late cabbage for storing purposes, as its keeping qualities are unsurpassed. Our seed comes from one of the most reliable Danish growers. Price, pkt., 10c; oz., 30c; ¼ lb., $1.00; lb., $3.50.

Holland Short Stem. This kind is rather similar to the Ballhead, only it has a short stem. A fine keeper. This kind is mostly grown in the great cabbage districts of Wisconsin, Michigan, Illinois and Indiana. Our seed may be depended upon to be first class. Pkt., 10c; oz., $0.30; ¼ lb., $1.00; lb., $3.50.

BUGNER'S CABBAGE

We herewith introduce to our customers a late variety of Cabbage, which we can most heartily recommend. It has all the good qualities a late variety should have. Large, fine ribbed, very solid and not easy to crack and a splendid keeper. A vigorous grower and one of the best to withstand the disease. This variety was bred by Mr. Bugner, one of the most successful Northern gardeners and he has grown this Cabbage for over twenty years, raising his own seed every year. We have been fortunate in obtaining some seed this year and have a limited supply of seed, grown by Mr. Bugner himself in stock. Gardeners who usually plant Holland or Danish Ballhead for a late cabbage, should not fail to try this kind. Price, Pkt., 25c; oz., $1.50; ¼ lb., $5.00.

We will have a liberal supply of Holland grown seed next year.

Celery Cabbage

Last year's results have proven that this new vegetable does best, when sown the latter part of June for a fall crop, as it can not stand the summer heat. The best way is to sow it with the machine in rows about two feet apart and to thin the plants out later on, so that they come about a foot apart in the row. Pkt., 10c; oz., 30c; lb., $2.50.

Savoy Cabbage

American Allhead Savoy. One of the best, fine curled, good sized, excellent flavor. Pkt., 5c; oz., 30c; ¼ lb, $1.00; lb., $3.00.

Extra Early Coreless. A very handsome stump-rooted carrot about the length of the Danvers. Matures before any other variety.
**CARROTS—Continued.**

Top small, considering the size of the roots, which are smooth, straight and free from roughness; without core; very tender and sweet. Excellent for early or late. Oz., 15c; ¼ lb., 40c; lb., $1.25.

**Guerande or Oxeart.** A short, thick stump-rooted carrot of good quality. About two-thirds the length of Chantenay and thicker. Oz., 10c; ¼ lb., 25c; lb., $0.80.

### About Cauliflower Seed

Our Cauliflower seed has given the best satisfaction for years. We are fully aware of the importance of this crop and have our seeds grown every year by good reliable growers. We will be glad to give you names of people, who had this seed from us last year. Ask the man who grows it.

### Celery

One ounce will produce about 5,000 plants.
CELY—Continued.

Paris Golden Self-blanching. The finest standard strain of self-blanching celery. Our seed comes direct from the original introducers from Paris, France. None better. Pkt., 15c; oz., $1.00; ½ lb., $3.00; lb., $10.00.

Golden Selfblanching American Grown Seed. Grown from original French stock seed. Plants are somewhat more robust than those grown from the French seed. The seed is usually of stronger germination than the imported seed. Oz., 10c; ½ lb., $1.25; lb., $4.00.

William’s Perfected Yellow. This variety was introduced by us three years ago. Last year, however, we were unable to procure good seed of this variety, and rather than taking chances, we decided not to list it. We now have been fortunate in obtaining a quantity of seed again direct from the originator and undoubtedly all of our friends, who have grown this variety when we first introduced it, will consider this good news. Those, who have not tried it yet, we can recommend to give it a trial this season. It is far superior than Golden Selfblanching in every respect. Price, Pkt., 25c; oz., $1.25; ½ lb., $4.50; lb., $15.00.

Snowflake. This is a worthy companion to the Mayflower. It is second early and comes in about 10 days later than Mayflower. Ears are large, well set, and pure white. The shape is ideal—long, slim and perfectly straight—the color is dark glossy green and the flesh is brittle and tender with a small seed capacity. It is a strong grower and seems to resist the cucumber disease better than any other variety. We recommend for summer and fall sowing our selected strain of VICTORIA SPINACH. Dark green, thick leaves and one of the best to resist the summer heat.
FERTILIZERS

Farm labor is too scarce and costly to be used on low yielding unfertilized fields. The same labor is twice and three times as productive when fertilizer is properly used to feed the crops and make the larger yields per acre. The cost of labor per bushel is cut in two and the saving is added to your profits.
